

AZURE CLI COMMANDS

AZ COMMANDS	
az account	Manage Azure subscription information.
az acr	Manage private registries with Azure Container Registries.
az acs	Manage Azure Container Services.
az ad	Manage Azure Active Directory Graph entities needed for Role Based Access Control.
az advisor	Manage Azure Advisor.
az afd	Manage Azure Front Door.
az ai-examples	Add AI powered examples to help content.
az aks	Manage Azure Kubernetes Services.
az alias	Manage Azure CLI Aliases.
az ams	Manage Azure Media Services resources.
az apim	Manage Azure API Management services.
az appconfig	Manage App Configurations.
az appservice	Manage App Service plans.
az arcappliance	Commands to manage an Appliance resource.
az arcddata	Commands for using Azure Arc-enabled data services.
az aro	Manage Azure Red Hat OpenShift clusters.
az artifacts	Manage Azure Artifacts.
az attestation	Manage Microsoft Azure Attestation (MAA).
az automation	Manage Automation.
az azurestackhci	Manage azurestackhci.
az backup	Manage Azure Backups.
az baremetalinstance	(PREVIEW) Manage BareMetal Instances.
az batch	Manage Azure Batch.
az batchai	Manage Batch AI resources.
az bicep	Bicep CLI command group.
az billing	Manage Azure Billing.
az blockchain	Manage blockchain.
az blueprint	Commands to manage blueprint.
az boards	Manage Azure Boards.
az bot	Manage Microsoft Azure Bot Service.
az cache	Commands to manage CLI objects cached using the --defer argument.
az capacity	Manage capacity.
az cdn	Manage Azure Content Delivery Networks (CDNs).
az cli-translator	Translate ARM template or REST API to CLI scripts.

az cloud	Manage registered Azure clouds.
az cloud-service	Manage cloud service (extended support).
az codespace	Manage Visual Studio Codespaces.
az cognitiveservices	Manage Azure Cognitive Services accounts.
az communication	Manage communication service with communication.
az config	Manage Azure CLI configuration.
az configure	Manage Azure CLI configuration. This command is interactive.
az confluent	Manage confluent resources.
az connectedk8s	Commands to manage connected kubernetes clusters.
az connectedmachine	Manage Connected Machine.
az connectedvmware	Commands to manage Connected VMware.
az consumption	Manage consumption of Azure resources.
az container	Manage Azure Container Instances.
az cosmosdb	Manage Azure Cosmos DB database accounts.
az costmanagement	Manage cost and billing in Azure.
az csvmware	Manage Azure VMware Solution by CloudSimple.
az customlocation	Commands to Create, Get, List and Delete CustomLocations.
az custom-providers	Commands to manage custom providers.
az databox	Manage databox.
az databoxedge	Support data box edge device and management.
az databricks	Manage databricks workspaces.
az datadog	Manage datadog.
az datafactory	Manage Data Factory.
az dataprotection	Manage Data Protection.
az datashare	Commands to manage datashare.
az dedicated-hsm	Dedicated-hsm to create, update, list, show, and delete HSMs.
az demo	Demos for designing, developing and demonstrating Azure CLI.
az deployment	Manage Azure Resource Manager template deployment at subscription scope.
az deploymentmanager	Create and manage rollouts for your service.
az deployment-scripts	Manage deployment scripts at subscription or resource group scope.
az desktopvirtualization	Manage desktop virtualization.
az devops	Manage Azure DevOps organization level operations.
az disk	Manage Azure Managed Disks.
az disk-access	Manage disk access resources.
az disk-encryption-set	Disk Encryption Set resource.

az disk-pool	Manage Azure disk pool.
az dla	Manage Data Lake Analytics accounts, jobs, and catalogs.
az dls	Manage Data Lake Store accounts and filesystems.
az dms	Manage Azure Data Migration Service (DMS) instances.
az dnc	Manage Delegated Network.
az dt	Manage Azure Digital Twins solutions & infrastructure.
az elastic	Manage Microsoft Elastic.
az eventgrid	Manage Azure Event Grid topics, domains, domain topics, system topics partner topics, event subscriptions, system topic event subscriptions and partner topic event subscriptions.
az eventhubs	Manage Azure Event Hubs namespaces, eventhubs, consumergroups and geo recovery configurations - Alias.
az extension	Manage and update CLI extensions.
az feature	Manage resource provider features.
az feedback	Send feedback to the Azure CLI Team.
az find	I'm an AI robot, my advice is based on our Azure documentation as well as the usage patterns of Azure CLI and Azure ARM users. Using me improves Azure products and documentation.
az footprint	
az functionapp	Manage function apps. To install the Azure Functions Core tools see https://github.com/Azure/azure-functions-core-tools .
az fzf	Commands to select active or default objects via fzf.
az graph	Query the resources managed by Azure Resource Manager.
az group	Manage resource groups and template deployments.
az guestconfig	Manage Guest Configuration.
az hanainstance	(PREVIEW) Manage Azure SAP HANA Instance.
az hdinsight	Manage HDInsight resources.
az healthbot	Manage bot with healthbot.
az healthcareapis	Manage Healthcare Apis.
az hpc-cache	Commands to manage hpc cache.
az identity	Managed Service Identities.
az image	Manage custom virtual machine images.
az import-export	Manage Import Export.
az init	It's an effortless setting up tool for configs.
az interactive	Start interactive mode. Installs the Interactive extension if not installed already.
az internet-analyzer	Commands to manage internet analyzer.
az iot	Manage Internet of Things (IoT) assets.
az k8sconfiguration	Commands to manage Kubernetes configuration.

az k8s-configuration	Commands to manage resources from Microsoft.KubernetesConfiguration.
az k8s-extension	Commands to manage Kubernetes Extensions.
az keyvault	Manage KeyVault keys, secrets, and certificates.
az kusto	Manage Azure Kusto resources.
az lab	Manage Azure DevTest Labs.
az local-context	Manage Local Context.
az lock	Manage Azure locks.
az logic	Manage Logic.
az logicapp	Manage logic apps.
az login	Log in to Azure.
az logout	Log out to remove access to Azure subscriptions.
az logz	Manage Microsoft Logz.
az maintenance	Manage Maintenance.
az managedapp	Manage template solutions provided and maintained by Independent Software Vendors (ISVs).
az managed-cassandra	Azure Managed Cassandra.
az managedservices	Manage the registration assignments and definitions in Azure.
az managementpartner	Allows the partners to associate a Microsoft Partner Network(MPN) ID to a user or service principal in the customer's Azure directory.
az maps	Manage Azure Maps.
az mariadb	Manage Azure Database for MariaDB servers.
az mesh	(PREVIEW) Manage Azure Service Fabric Mesh Resources.
az ml	Manage Azure Machine Learning resources.
az ml	Manage Machine Learning resources.
az monitor	Manage the Azure Monitor Service.
az mysql	Manage Azure Database for MySQL servers.
az netappfiles	Manage Azure NetApp Files (ANF) Resources.
az network	Manage Azure Network resources.
az next	Recommend the possible next set of commands to take.
az notification-hub	Manage Notification Hubs.
az offazure	Manage on-premise resources for migrate.
az openshift	Manage Azure Red Hat OpenShift 3.11 clusters.
az peering	Manage peering.
az pipelines	Manage Azure Pipelines.
az policy	Manage resource policies.
az portal	Manage Portal.
az postgres	Manage Azure Database for PostgreSQL servers.

az powerbi	Manage PowerBI resources.
az ppg	Manage Proximity Placement Groups.
az provider	Manage resource providers.
az providerhub	Manage resources with ProviderHub.
az purview	Manage Purview.
az quantum	Manage Azure Quantum Workspaces and submit jobs to Azure Quantum Providers.
az redis	Manage dedicated Redis caches for your Azure applications.
az redisenterprise	Manage dedicated Redis Enterprise caches for your Azure applications.
az relay	Manage Azure Relay Service namespaces, WCF relays, hybrid connections, and rules.
az remote-rendering-account	Manage remote rendering account with mixed reality.
az repos	Manage Azure Repos.
az reservations	Manage Azure Reservations.
az resource	Manage Azure resources.
az resource-mover	Move resources in Azure.
az rest	Invoke a custom request.
az role	Manage user roles for access control with Azure Active Directory and service principals.
az sapmonitor	(PREVIEW) Manage Azure SAP Monitor.
az search	Manage Azure Search services, admin keys and query keys.
az security	Manage your security posture with Azure Security Center.
az self-test	Runs a self-test of the CLI.
az sentinel	Manage Security Insight.
az serial-console	Connent to the Serial Console of a Linux/Windows Virtual Machine or VMSS Instance.
az servicebus	Manage Azure Service Bus namespaces, queues, topics, subscriptions, rules and geo-disaster recovery configuration alias.
az sf	Manage and administer Azure Service Fabric clusters.
az sig	Manage shared image gallery.
az signalr	Manage Azure SignalR Service.
az snapshot	Manage point-in-time copies of managed disks, native blobs, or other snapshots.
az spatial-anchors-account	Manage spatial anchor account with mixed reality.
az spring-cloud	Commands to manage Azure Spring Cloud.
az sql	Manage Azure SQL Databases and Data Warehouses.

az ssh	SSH into resources (Azure VMs, etc) using AAD issued openssh certificates.
az sshkey	Manage ssh public key with vm.
az stack-hci	Manage Azure Stack HCI.
az staticwebapp	Manage static apps.
az storage	Manage Azure Cloud Storage resources.
az storagesync	Manage Azure File Sync.
az stream-analytics	Manage Stream Analytics.
az support	Manage Azure support resource.
az synapse	Manage and operate Synapse Workspace, Spark Pool, SQL Pool.
az tag	Tag Management on a resource.
az term	Manage marketplace agreement with marketplaceordering.
az ts	Manage template specs at subscription or resource group scope.
az tsi	Manage Azure Time Series Insights.
az upgrade	Upgrade Azure CLI and extensions.
az version	Show the versions of Azure CLI modules and extensions in JSON format by default or format configured by --output.
az vm	Manage Linux or Windows virtual machines.
az vmss	Manage groupings of virtual machines in an Azure Virtual Machine Scale Set (VMSS).
az vmware	Commands to manage Azure VMware Solution.
az webapp	Manage web apps.
az webpubsub	Commands to manage Webpubsub.
